Granite Creek Cleanup One Man's Treasure

This year Prescott Creeks will once again host the annual Granite Creek Cleanup. It will take place **Saturday, April 23rd from 9 am at Granite Creek Park.** Every year hundreds

of people gather for this unique community event and in approximately two hours pull anywhere between 3 and 8 tons of trash from our local creeks and lakes. All this is done with the support of the City of Prescott, local businesses, and even more volunteers with the sole intent to make Prescott a healthier, more beautiful place for everyone. For more information on what we're planning for this year's Cleanup see [this blog](#).

Amanda Richardson Prescott Young Professionals Visionary Award Winner

Amanda Richardson, Prescott Creeks' Watershed program Coordinator, was honored as one of ten young men and women awarded the [Prescott Young Professionals'](#) Visionary award. Winners of this award are those professionals from 21-40 years old who are poised to play key, visionary roles in shaping their communities and their businesses in the coming decade.

We're Moving

Prescott Creeks is relocating its office during the middle of March to 822 West Gurley Street. Leaving The Grove is hard, but growth and changing needs make this a positive move. Our contact

information will stay the same. We look forward to showing off our new location in the near future.

Celebrate Spring Donate to Your Creeks

Your support is important to the work of restoring the habitat, improving water quality, and providing a more beautiful piece of our community. To show your support for the creeks, [donate here](#).

Training at National River Rally

June 3 - 6, 2011

At [River Rally](#), you will:

- learn the best strategies for river restoration;
- test and help improve the newest tools and technologies for watershed protection;
- deliver and discuss critical information from the field and from Washington, DC; and
- connect with the people you need to achieve your goals.

Whether you work for, volunteer with or otherwise support organizations that protect and restore our freshwater lifelines, your efforts—individually and collectively—are amazing.
